EDUCATION

Louisiana State University - Baton Rouge
Bachelor of Science - Petroleum Engineering

Baton Rouge, LA
Graduation Date: May 2016

General Assembly
Certification - Computer Science

Atlanta, GA
Graduation Date: Feb 2023

WORK EXPERIENCE

SSE Shreveport, LA
Project Manager - Business Development *Dec 2019 - Present*

- Conceptualized and executed a cloud-based software solution for individual franchisee use, resulting in a 30% increase in operational efficiency across 120+ locations.
- Led negotiations and established agreements for new franchise locations, expanding the network by 25%.
- Managed contract negotiations with key vendors and service providers, ensuring compliance and fostering positive relationships to support company growth.
- Led renovation projects for existing restaurant locations and oversaw the development of new franchise locations, ensuring projects were completed on time and within budget, enhancing brand consistency and customer experience.

Basin Pump Down Services (BPDS) Midland, TX
Project Engineer - Completions *Nov 2018 - Dec 2019*

- Developed and implemented a standardized completions procedures manual, resulting in an average increase of 20% well production efficiency and a reduction in project execution timelines.
- Facilitated onboarding process for new engineers through conducting comprehensive training sessions, leading to a 30% decrease in ramp-up time and an increase in project execution accuracy.
- Managed procurement process for materials, ensuring timely project execution while maintaining a focus on safety protocols which resulted in zero safety incidents and zero downtime.
- Evaluated operational processes and recommended strategic design changes for well stimulation services, resulting in an average increase of 30% in returns and average cost savings of over \$500,000/well.

Frac Tech Services International (FTSI) Shreveport, LA
Project Engineer - Frac *May 2017 - Aug 2018*

- Provided comprehensive technical advice, assessments, and evaluations to clients, ensuring the efficient design, development, and operation of well stimulation services and recommended strategic design changes where appropriate.
- Collaborated with the National Operations Center (NOC) to implement equipment enhancement projects, leading to a 20% reduction in downtime and an increase in overall equipment reliability.
- Managed inventory of fluids, chemicals, and proppants at job sites across multiple formations, ensuring continuous operational flow while reducing delivery lead times and NPT.

Halliburton Odessa, TX
Mechanical Engineering Technician *Nov 2016 - May 2017*

- Assembled and disassembled mud motors and MWD tools according to customer specifications, guaranteeing seamless integration into drilling operations.
- Collaborated with rig crews and transport/hotshot companies to coordinate efficient delivery of equipment to job sites.
- Executed precision maintenance tasks on downhole tools, ensuring optimal functionality and adherence to strict specifications.

SKILLS

Software: Office Suite, Excel/VBA, SQL, MATLAB, Python, JavaScript Libraries and Frameworks, jQuery

Soft Skills: Adaptability, Process Improvement, X-functional Collaboration, Detail-Oriented, Market Analysis
